SUMMARY

Full Stack Developer focused on Front-end, with end-to-end experience across corporate and freelance projects — from interfaces built in React, Vue.js and Nuxt.js to APIs in Node.js and Java, including self-managed infrastructure (VPS, DNS, SSL) and performance/SEO optimization. Combines solid technical execution with product thinking, looking to join a team where he can contribute measurable results and sustainable, long-term code.

PROFESSIONAL EXPERIENCE

Single Software

Junior Front-end Developer — 2026 – Present

- Develop reusable front-end components within a multibrand architecture used across 5+ brands, reducing rework and rollout time for new screens.
- Maintain Design System consistency across multiple applications, preventing visual divergence and ensuring new features follow the same UI standards without rework.
- Contribute to application performance (e.g. rendering/loading optimizations), directly improving the end-user experience.

Brasystem — Freelance · brasystem.net

2026

- Designed and built the brand's website from the ground up (front-end, back-end and infrastructure), reaching a 92 PageSpeed Insights SEO score through performance optimizations and accessibility/semantic best practices.
- Configured and managed the full infrastructure on a fully self-managed Hostinger VPS (no managed hosting), including DNS, SSL/HTTPS certificates and the production environment.
- Built a custom admin panel that lets the client manage banners and plan pricing without relying on technical support.

AnimaBrindes — Freelance · animabrindes.com

2025

- Led the project end-to-end: Figma prototyping validated directly with the client, development, and production deployment.
- Reduced client alignment rework by validating the layout in Figma before implementation, avoiding late-stage code rewrites.
- Sole technical owner of the project (dev + infrastructure), delivering a production site with HTTPS/SSL configured and ready for commercial use.

EDUCATION

UniFacisa Centro Universitário — Campina Grande, PB
B.Tech. in Information Systems (2023 – expected graduation: 2027)

Colégio Imaculada Conceição Damas
High School Diploma (2020 – 2022)

SKILLS

Front-end: JavaScript (ES6+), React, Vue.js, Nuxt.js, HTML, CSS, Tailwind.

Back-end & Data: Node.js, Java, PostgreSQL.

Infrastructure & Tools: Git, VPS Management (Hostinger), DNS & SSL/HTTPS Configuration.

Soft Skills: Direct client/stakeholder communication, product and UX vision, adaptability across contexts and stacks.
